

AMENDMENTS TO THE ABSTRACT

The Examiner has objected to the abstract as filed May 5, 2008 because the amendments to the abstract showed the abstract as originally being a single paragraph, whereas it should have been shown as two paragraphs. Applicants request that the amendments to the abstract of the substitute specification filed May 5, 2008 be replaced with the amendments shown below:

ABSTRACT

~~The present invention relates to an~~ An interlabial pad is provided that can be easily fixed to the interlabial space, ~~and a~~ a wrapping body ~~wherein is provided having~~ wherein is provided having a wrapping container ~~that contains the same providing an~~ that contains the same providing an interlabial pad, ~~with a structure make secure and hygienic fixing to the interlabial space of females easier and a~~ with a structure make secure and hygienic fixing to the interlabial space of females easier and a ~~Also provided is an~~ Also provided is an independent wrapping body ~~to contain thereof. In the interlabial pad, a finger insertion opening is formed along the longitudinal direction of a back side sheet between a mini sheet piece and the side opposite to body on the back side sheet. An opening of the finger insertion opening for inserting a finger leads to a finger insertion restriction portion to restrict the insertion of the finger.~~

~~In the interlabial pad according to the present invention, a finger insertion opening is formed along the longitudinal direction of a back side sheet between a mini sheet piece and the side opposite to body on the back side sheet, an opening of the finger insertion opening is a finger insertion opening where an opening with width of a finger is secured directly towards said side opposite to body and the end edge of the finger insertion opening is a finger insertion restriction portion to stop progress of insertion of a finger.~~
